SI-3TM

Special Application Radar

The SI-3 provides a configurable, self-contained, speed radar unit, designed for use in a variety of OEM applications.

The SI-3 provides a compact radar solution for your measurement needs. Using the SI-3 software, the system can be programmed to process traffic moving toward, away or in both directions. Settings such as sensitivity, speed range, units of measure (MPH or km/h), update rate, data format, and baud rate can be programmed. Measuring only 3" in circumference by 5.6" long the SI-3 is small, compact and reliable. small, compact profile.

Features

- K-Band Antenna
- FCC Part 15 (No License Required)
- Directional
- RS232 Serial Port
- Stationary Mounted Radar Systems
- 5-150 MPH (8-241 km/h) Speed Range
- Range: 1,500 Ft. Default (3,000 Ft. Max.)
- Weatherproof
- Operates from 10 VDC to 24 VDC
- Programmable for MPH or km/h
- Windows-Based Firmware Configuration Software
- Fast or Stronger Signal Target Selection
